

5131 – Windows Server 2008 Administration

TARGET AUDIENCE/DESIGNED FOR:

This course is intended for Windows Server administrators who operate Windows servers on a daily basis and want to learn the skills for configuring, managing, and maintaining the core technical areas of Windows Server 2008.

This course has been designed to provide students with the skills and knowledge to install and configure Windows Server 2008 in workgroup environments and as part of a Windows 2008 domain environment. Students will also be able to configure file, print and terminal services on a Windows 2008 Server.

PREREQUISITES:

Before attending this course students must have gained the following certifications or have the equivalent knowledge:

CompTIA A+

CompTIA Network+

MCTS – Configuring Windows 7

OBJECTIVES:

This course is designed to prepare students to take the Microsoft Exam 70-646 Windows Server 2008, Server Administrator, and is required for the Microsoft Certified IT Professional (MCITP) accreditation.
