

## Course Overview

[View course schedule](#)

This course gives a broad overview into computer hardware, providing detailed information into the System Board, and provides a detailed look into storage devices.

A+ Certification ONE is the first of two courses, which together are designed to prepare candidates for the following CompTIA exams:

220-601 - A+ Essentials

220-602 - A+ IT technician

## Aims and Objectives

Gain the knowledge and practical experience to be ready for CompTIA PC Support Hardware Exam 220-601.

## Target Audiences

Current IT Service desk personnel wishing to have their skills endorsed and individuals with a good knowledge of PCs and a keen interest to know more and attain A+ Certification.

## Prerequisites

Delegates should be generally familiar with using PCs, including keyboard and mouse skills, but are not required to have prior experience in computer maintenance.
