Why Choose MCSA?

The Desktop and Server products form only part of the Windows system. An MCSA has to be able to fully manage and administer the network environment. Microsoft introduced this qualification, in recognition of the fact that the MCSE programme was too advanced for what most operators required in industry, as it covers the designing of the network infrastructure.

The MCSA is recognised as the "Hottest Certification" currently, and demand is anticipated to grow into the foreseeable future. Microsoft's own research points to a 13% rise in demand year-on-year.

For those with longer term ambitions, the MCSA will ensure you are well on your way to becoming an MCSE.

What do our courses comprise of?

A suite of training products and online services, bringing together the best features of instructor-led training, computer-based training and distance learning:

Course Manuals – the core material, whatever the method of study

Multimedia CDs – extra resources to aid independent learning

Online Mentoring – questions answered online by subject experts

Online Tutorials – live, interactive, instructor-led sessions

Online Progress Testing – used to measure progress and highlight areas of difficulty

Online Exam Preparation – practice for exams leading to recognised qualifications

Virtual Labs – online access to specialised systems

Learning Management System – online tools to access records and manage training

At the end of this course you will be able to:-

Install and configure Microsoft Windows Professional and Server

Perform maintenance and troubleshooting tasks

Install, configure and troubleshoot Active Directory Systems

Perform detailed Network Administration tasks

Potential Job Roles

Network and Server Support

Office IT Manager

Network Administrator

Network Manager

Course Outline

The Microsoft Certified Systems Administrator (MCSA) credential proves that you have the skills to successfully implement, manage and troubleshoot the ongoing needs of Microsoft Windows® based operating environments.

There are two tracks that an MCSA can take that we offer. Both require study of Windows Professional and Server and managing the networking infrastructure. The difference is whether you study the CompTIA elective or another Microsoft elective. Full details can be found at www.microsoft.com/traincert.

Exam Details

MCSA candidates are required to pass 4 exams typically:

Core exams 3

Elective exam 1
