training

## Why Choose MCSE?

The MCSE is Microsoft's top networking qualification and has been the aspiration of many since its introduction in the mid 1990's. During the late 1990's the qualification suffered from the proliferation of "Paper MSCE's" but Microsoft have toughened the exams to elevate the MCSE back to its rightful position.

Those who achieve Microsoft's premier certification can fully design and implement the Windows Desktop and Server family products in a secure networked environment.

## What do our courses comprise of?

A suite of training products and online services, bringing together the best features of instructor-led training, computer-based training and distance learning:

**Course Manuals** – the core material, whatever the method of study

**Multimedia CDs** – extra resources to aid independent learning

**Online Mentoring** – questions answered online by subject experts

**Online Tutorials** – live, interactive, instructor-led sessions

**Online Progress Testing** – used to measure progress and highlight areas of difficulty

**Online Exam Preparation** – practice for exams leading to recognised qualifications

**Virtual Labs** – online access to specialised systems

**Learning Management System** – online tools to access records and manage training

## At the end of this course you will be able to:-

Install, configure and troubleshoot Microsoft Windows Networks

Design and maintain stable and secure Microsoft Networking Solutions

Design, install, configure and troubleshoot Active Directory Systems

Perform advanced Network Administration tasks

Implement all elements in a Microsoft Network

## Potential Job Roles

Network and Server support

Office IT Manager

Network Administrator

Network Manager

Systems Administrator

Systems Engineer

## Course Outline

The Microsoft Certified Systems Engineer (MCSE) credential is the premier certification for professionals who design and implement the infrastructure for business solutions, based on the Microsoft Windows Desktop and Server Systems.

As Microsoft continually update their software and course requirements, further details of what we can offer are available from our course advisors.

## Exam Details

Currently candidates are required to pass up to 7 exams to gain the MCSE certification and typically include:

Windows Professional

Windows Server

Designing Infrastructure

Active Directory

Security

Infrastructure Implementation
